

CEC-1000 CABINET

For Strahman Water Mixing Hose Stations

For when you want to conceal the mixing unit piping and complete hose assembly.

The CEC-1000 Cabinet Recessed Box Series is designed to conceal the complete water hose station from being exposed to dust and other environmental hazards. Plus it looks good and is especially ideal for new construction but can easily be installed to recess into any wall.

The cabinet is designed with flush hinges that swing open to 180° making the equipment easily accessible. Prefabricated holes for top entry or back entry make connections to your piping system very easy.

CEC-1000 Cabinet Series comes installed with your choice of the Strahman Mixing Hose Station:

- M-5000TG
- M-5700TG
- M-5144TGHE
- M-144TG
- M-5000TS
- M-750TG
- M-750
- M-159TG
- M-159
- M-200TS
- M-144TG

Standard unit placement is on-center horizontally, but can be customized to your desired placement as shown below. Hose and Spray Nozzle are sold separately.

◀ Shown with a customized set-up with an M-200TS Thermostatically Controlled Mixing Hose Station complete assembly with Strahman Yellow Extruded Hose and Hydro-Pro® 150 Spray Nozzle

▶ Shown with standard set-up with an M-750TG Mixing Hose Station complete assembly with Strahman Red Premium Hose and Red M-77 Spray Nozzle

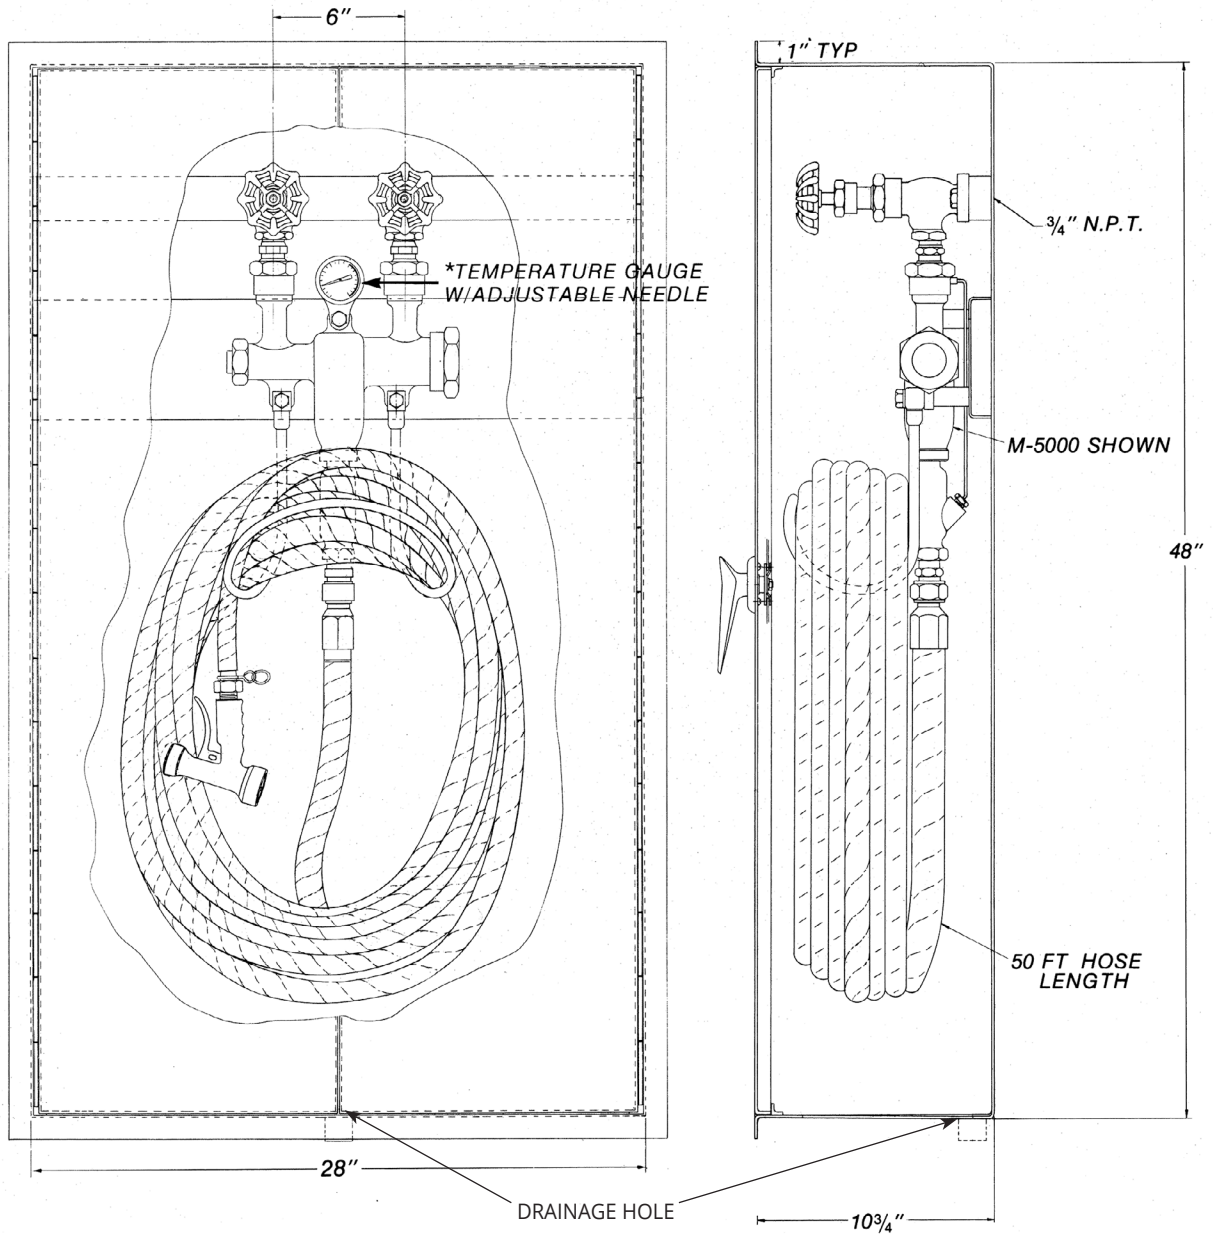

Cabinet is made of high quality heavy gauge stainless steel.
